Professional Summary

Motivated and detail-oriented final-year B.Tech student in Computer Science and Information Technology with strong skills in **C, C++, Python, and Object-Oriented Programming**. Experienced in building scalable applications, debugging complex issues, and documenting solutions. Completed internships in MERN development and AI/ML, along with a C++ Software Engineering simulation at Electronic Arts, demonstrating adaptability across software development roles.

Education

B.Tech in Computer Science and Information Technology

Nov 2022 – Present

Dronacharya Group of Institutions, Greater Noida

SGPA: 8.0

Relevant Courses: Operating Systems, Data Structures & Algorithms, Artificial Intelligence, Machine Learning, Computer Networks, DBMS, OOP, Data Analytics

Technical Skills

Programming: C, C++, Python, JavaScript

Core Concepts: OOP, Data Structures & Algorithms, Debugging, Documentation

Frontend/Backend: HTML5, CSS, React.js, Node.js, Bootstrap

Database: MySQL, MongoDB

Tools: GitHub, Power BI, Excel

Soft Skills: Team Coordination, Leadership, Communication

Projects

GreenTrace – Smart Carbon Footprint Tracker

- Applied APIs & Python scripts to process emission data with AI-driven suggestions.
- Documented system workflow and testing procedures for usability.

Petsthetic – Pet Care & Adoption Platform

- Built modular React components with maintainable code structure.
- Collaborated in a team environment, ensuring proper documentation and feature delivery.

Experience

Machine Learning Intern – SmartBridge (Remote)

Jun 2025 – Aug 2025

- Implemented supervised & unsupervised algorithms in Python with optimized code.
- Debugged data preprocessing pipelines, improving model performance.
- Documented code, results, and testing procedures.

MERN Stack Intern – Elite Tech Intern (Virtual)

Jul 2025 – Aug 2025

- Developed weather app & e-commerce system; optimized code for scalability.
- Collaborated in peer code reviews and improved application reliability.

Software Engineer Job Simulation – Electronic Arts (Remote, Virtual Experience)

- Completed job simulation focused on C++ development for game engineering tasks.

- Applied OOP principles to build maintainable code modules.
- Debugged and optimized C++ programs, enhancing performance and reliability.
- Learned industry-level coding practices followed by EA software engineers.

Certifications

- Data Analytics with Excel
- Data Structures and Algorithms (Google)
- Google AI Essentials Certificate
- Prompt Engineering (Google)
- AWS Cloud Certificate
- Electronic Arts – Software Engineer Virtual Experience Certificate (C++)
